## San Diego

San Diego is a city in the U.S. State of California on the coast of the Pacific Ocean, approximately 120 miles south of Los Angeles and immediately adjacent to the border with Mexico. With an estimated population of 1,425,976 as of July 1, 2018, San Diego is the eighth-largest city in the United States and second-largest in California. The city is known for its mild year-round climate, natural deep-water harbor, extensive beaches, long association with the United States Navy, and recent emergence as a healthcare and biotechnology development center.

The city is the seat of San Diego County and is the economic center of the region as well as the San Diego-Tijuana metropolitan area. San Diego's main economic engines are military and defense-related activities, tourism, international trade, and manufacturing. The presence of the University of California, San Diego (UCSD), with the affiliated UCSD Medical Center, has helped make the area a center of research in biotechnology.
